DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/12/2008 has been entered.

Response to Amendment

2. The amendments, filed 01/12/2009 have been entered and made of record. Claims 1-7 are pending.

Response to Arguments

3. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Plourde JR. (US Pat. No. 2003/0105918).

Regarding claim 1, Plourde discloses a method of increasing the available storage space in a memory comprising the steps of:

defining in a the memory a free memory list, the free memory list contained in a first physical memory area of the memory, the free memory list configured to contain one or more portions of one or more files (see figures 3B, 5A-5C and paragraphs 0087 and 0090);

storing a file in the memory, the file including a first portion contained in a second physical memory area of the memory and a second portion contained in a third physical memory area of the memory (see figure 3B, paragraphs 0065 and 0084);

selecting a the first portion the file stored for deletion (see paragraph 0092); and

copying only the selected first portion of the file from the second physical memory area to the first physical memory area containing the free memory list without copying a the second portion of the file contained in the third physical memory_ area and resulting in the second physical memory area being deallocated (see figures 5D, 5E and paragraph 0085).

Regarding claims 2 and 5, Plourde discloses the file is an audio file or a video file (see fig. 3A).

Regarding claim 3, Plourde discloses the selecting the first portion of the file stored on the electronic storage medium creates a plurality of file segments (see figure 5D and 8A-8C).

Regarding claim 4, Plourde discloses the step of linking the plurality of file segments together (see figure 5F).

Regarding claims 6 and 7, Okada discloses the electronic storage medium is a memory of a personal video recorder (see fig. 2 and paragraph 0087).
